

Transmission Services are offered as from 1 April 2019 as follow:

Sales channel <sup>1</sup>	Allocation method	SERVICES	Duration <sup>2</sup>
PRISMA	Auction	Blaregnies L	Y, Q, M, DA, WD
		Eynatten 1	
		Eynatten 2	
		Hilvarenbeek L	
		IZT	
		's Gravenvoeren	
		Virtualys	
		Zandvliet H	
	FCFS	Zelzate 1	Any duration
		Zeebrugge <sup>3</sup>	
		Zelzate 2	
		ZPT	
		Zeebrugge LNG Terminal	
		Dunkirk LNG Terminal <sup>4</sup>	
	Capacity Conversion Service (unbundled to bundled)	Y, Q, M, DA	
	Conversion into Short haul Services (OCUC and Wheeling)	Y, Q, M, DA <sup>5</sup>	
	Quality Conversion Service L→H <sup>6</sup>	Min 1 GD	
	Exit Service for End Users Domestic point <sup>7</sup>	Min 1 GD	
	Entry Service for End Users Domestic point	Y	
Implicit		Zeebrugge	B-o-D
		Entry and Exit Services on Loenhout	Not applicable
		Exit Service for Distribution Domestic point	Not applicable
		Entry Service for Distribution Domestic point	Not applicable

<sup>1</sup> Written procedure can be activated by Fluxys Belgium as fall-back mechanism, should PRISMA or EBS platforms be unavailable. Entry and Exit Services on IPs, VIPs and LNG Terminals, Quality Conversion Services and on Domestic Points can also be implicitly allocated by Fluxys Belgium to network users in case overnomination is being activated for such Connection Point. Overnomination will be activated when all Firm Transmission Services are sold after the Firm Day-Ahead auction and after the Interruptible Day Ahead auction if any or as a fall-back mechanism when PRISMA platform should be unavailable.

<sup>2</sup> (Y)= Yearly, (Q)= Quarterly, (M)= Monthly, (DA)= Day-Ahead, (WD)= Within-Day, (B-o-Y)= Balance of Gas Year, (GD)= Gas Day, (B-o-D)= Balance of Gas Day.

<sup>3</sup> Implicit allocation of Transmission Services at Zeebrugge also possible in the framework of the Imbalance Transfer Service.

<sup>4</sup> With the subscription of Dunkirk LNG Terminal entry capacity the associated Cross Border Delivery Service will be implicitly allocated meaning that they are matched in quantity, time and Capacity Type as described in ACT – Attachment A. No capacity will be allocable for a service period shorter than 1 gas day.

<sup>5</sup> Except for Short haul Services Wheeling and OCUC for which both Interconnection Points are sold via FCFS, the conversion into Short haul Services can be done for a Service Period of any duration..

<sup>6</sup> The possibility to use PRISMA to subscribe gas quality conversion service L→H on a “First-Committed-First-Services” is being developed. The start date will be confirmed by Fluxys Belgium at least 4 weeks in advance. Until then, products of any duration with a minimum duration of 1 Gas Day are allocated via FCFS allocation and can be requested via EBS or written request.

<sup>7</sup> The possibility to use PRISMA to subscribe exit services for end users domestic points on a “First-Committed-First-Served” is being developed. The start date will be confirmed by Fluxys Belgium at least 4 weeks in advance. Until then, exit services for end users domestic points can be subscribed using EBS.

Sales channel	Allocation method	SERVICES		Duration
Written only	Pro rata and FCFS	Quality Conversion Service H→L <sup>8</sup>		Multi Y, Y and B-o-Y
	Not applicable	Other Services	Zee Platform	Not applicable
			ZTP Trading Services	
			Imbalance Pooling Service	
			L/H Capacity Switch Service	
		Diversion Service <sup>9</sup>		

---

8 First subscription window (written only), for which Year and/or Multi-Year products are allocated pro rata request (Base and Seasonal), with a priority for longest period for Peak product. After subscription window (written only) Balance of Gas Year products are allocated via FCFS principle and are subject to availability and to the required logistics (e.g. with nitrogen suppliers).

9 The possibility to use PRISMA to request the Diversion of existing services is being developed. The start date will be confirmed by the TSO at least 4 weeks in advance. Until then, the procedure remains manual
