

**Demand assessment report
for incremental capacity process starting 2023
between France market area PEG and the
Belgium market area ZTPL where no non-
binding demand indications were received**

2023-10-23

This report is a joint assessment of the potential for incremental capacity projects conducted by

F. Fees	5
G. Contact information	5

A. Non-binding Demand indications

In line with Art. 26 of Regulation (EU) 2017/459, the transmission systems operators conducting this market demand assessment report gave network users the opportunity to submit non-binding demand indications to quantify potential demand for incremental capacity. The period for submission on both sides of the border between France market area PEG and Belgium market area ZTPL was from 3th of July to 28th August 2021 (COB).

Within this period, no non-binding demand indications regarding the respective border were received by the TSOs until the publication date of the report.

B. Demand assessment

i. Historical usage pattern

As stated above, for the incremental capacity cycle addressed by this report no non-binding market demand indications were received. Therefore, an analysis of the historical capacity utilization between the respective entry-exit systems to support the assessment of the demand for incremental capacity is not necessary.

ii. Relations to GRIPS, TYNDP, NDPs

None of the relevant GRIPs, TYNDP or NDPs identified a need for incremental capacity. This conclusion was further confirmed by the market not submitting any non-binding market demand indications.

iii. Expected amount, direction and duration of demand for incremental capacity

Bearing in mind the elements mentioned above, there is no demand for incremental capacity identified stemming out of market indications.

Therefore, it is assumed by the TSOs that for the requested period, the availability of the gas transmission capacity at the respective entry-exit system border is currently sufficient to cover potential future need for capacity.

C. Conclusion for the (non) initiation of an incremental capacity project

Considering the elements mentioned in section A and B of this report, at this stage no ground is identified to consider starting an incremental project. This doesn't preclude the conclusions of a following demand assessment exercise. Hence, for the entry-exit-systems addressed by this report neither incremental capacity project nor technical studies will be initiated based on this market demand assessment report.

D. Provisional timeline

For the time being no incremental project will be initiated. The next incremental process will start after the yearly capacity auction in 2025.

E. Interim arrangements for the auction of existing capacity on the concerned IP(s)

Due to the fact that no incremental project will be initiated based on this market demand assessment, interim arrangements are not required for the time being.

F. Fees

For the incremental capacity cycle addressed in this report, none of the TSOs introduced a fee for the evaluation and processing of non-binding demand indications.
