

**Tariffs of Fluxys TENP GmbH –  
valid as of 1st January 2016**

**1) Capacity fees**

**a) Annual capacities**

For the provision of **firm capacities** at an entry or exit point for a booking period from 01 October, 6.00 a.m., of one year until 01 October, 6.00 a.m., of the following year, a specific tariff applies (tariff for standard annual capacities) according to the following table “Tariffs for firm capacities”.

**Tariffs for firm capacities**

Network point	Flow direction	Annual tariff €/ (kWh/h)/a			
		FZK	bFZK	BZK	Limited
Bocholtz	Entry	1.6158	1.5668	1.4542	0.2355
Bocholtz	Exit	1.6158	1.5668	1.4542	- <sup>1</sup>
Eynatten	Entry	1.6158	-	1.4542	0.2355
Eynatten	Exit	1.6158	-	1.4747	-
Wallbach	Entry	1.3882	-	1.2494	-
Wallbach	Exit	1.3882	-	1.2494	-

The tariff for **interruptible capacities** amounts to 90 % of the tariff for firm freely allocable capacities (FZK), according to Bundesnetzagentur decision BK9-14/608 (BEATE) para. 2 b).

**Tariffs for interruptible capacities  
and interruptible reverse flow capacities**

Network point	Flow direction	Annual tariff €/ (kWh/h)/a	
		Interruptible capacities	Reverse flow capacities
Bocholtz	Entry	1.4542	1.4542
Eynatten	Entry	1.4542	-
Eynatten	Exit	1.4542	-
Wallbach	Exit	1.2494	1.2494

<sup>1</sup> “-” means that such capacity product is not offered.

**b) Capacity for transport periods of less than one year**

For bookings of **capacities with transport periods of less than one year** (Quarter, Month, Day, Within-Day) the following multipliers in accordance with Bundesnetzagentur decision BK9-14/608 (BEATE) para. 2 a) apply.

For contracts concluded before entry into force of the BEATE decision with durations longer than 01.01.2016, the rules of the BEATE decision apply as well.

**BEATE multipliers**

Capacity duration	BEATE multiplier
Quarter	1.10
Month	1.25
Day/Within-Day	1.40

For bookings of capacities with transport periods of less than one year, in addition the following **seasonality factors** apply.

**Seasonality factors**

Period	Factor
October, November, December	1.30
January, February, March	1.40
April, May, June	0.65
July, August, September	0.65

To calculate the tariff for bookings of capacities with transport periods of less than one year, the respective annual fee is divided by 366 and then multiplied with the duration of the contract (in days), the corresponding BEATE multiplier and the corresponding seasonality factor (see tables above).

It thus follows that

$$F = \frac{AT}{366} * TP * BM * SF$$

with:

*F*= Fee (€/kWh/h) for capacity for a period of less than one year

*AT*= Annual tariff for the corresponding capacity product and network point

*TP*= Transport period (in days)

*BM*= BEATE multiplier applicable for the transport period

*SF*= Seasonality factor applicable for the period

### c) Additional fees

For **firm within-day capacities**, the fee for firm daily capacities applies in full.

For **interruptible within-day capacities**, the fee for interruptible daily capacities applies in full.

BEATE multipliers and seasonality factors are applied also on firm and interruptible within-day capacities.

## 2) Measurement and settlement fees

In addition to each exit tariff the following fees for measurement and settlement will be charged according to Article 15 para. 7 GasNEV (Gasnetzentgeltverordnung – Gas Network Fee Ordinance):

Fee	€/(kWh/h)/a
Measurement fee	0.02
Settlement fee	0.01

BEATE multipliers and seasonality factors are not applied on measurement and settlement fees.

### **3) Market area conversion charge**

The market area conversion charge in accordance with Section 10 of KoV VIII is charged by Fluxys TENP GmbH at all exit points in addition to the network tariffs. The market area conversion charge for calendar year 2016 for market area NCG amounts to 0.00005743 €/kWh/h/d (daily value).

BEATE multipliers and seasonality factors are not applied on the market area conversion charge.

### **4) Specific biogas levy**

The biogas levy will be charged in addition to the tariffs of exit points to directly connected end consumers and to downstream network operators. Exit points to storages, cross-border interconnection points and market area interconnection points are not taken into account in accordance with Article 7 KoV VIII.

The nationwide standard specific biogas levy for calendar year 2016, amounts to 0.59458 €/kWh/h/a (annual value).

BEATE multipliers and seasonality factors are not applied on the biogas levy.

### **5) Costs of capacity platforms**

The costs of the primary and secondary capacity platform are included in the entry/exit tariffs according to Article 12 para. 1 and para. 2 GasNZV (Gasnetzzugangsverordnung - Gas Network Access Ordinance).

### **6) Invoicing**

Monthly invoicing for quarterly and annual capacity products is based on the calculation approach explained in section 1) b) using the number of days of the respective month subject to invoicing and the corresponding seasonality factor. However, for annual products there is no application of the BEATE multipliers valid for capacities with transport periods of less than a year.

### **7) Taxes**

All tariffs do not include taxes.
