

Consultation Report 36
LNG Terminalling Tariffs for the 2019-2039 period

Version : 1.0

Status: Final

Classification: Public

1. INTRODUCTION 2

2. CONSULTATION PROCESS 2

3. OUTCOME OF CONSULTATION PROCESS 2

4. APPENDICES 2

1. INTRODUCTION

As from 30 April to 24 May 2019, Fluxys LNG consulted the market on the LNG Terminalling Tariffs for the use of the Zeebrugge LNG Terminal for the 2019-2039 period.

2. CONSULTATION PROCESS

Fluxys LNG launched this market consultation by publishing the proposed documents on its website - at the usual location for such consultations, supported by an announcement on the homepage - and via direct e-mailing to all registered market participants (LNG Shippers), associations and LNG prospects.

During the period from 30 April until 24 May 2019 (included), stakeholders were invited to submit their written feedback and, if needed, seek additional information through bilateral contacts with Fluxys LNG.

Fluxys LNG did not receive any comments on consultation n°36 during the consultation period and will submit for approval to the CREG the consulted LNG Terminalling Tariffs for the use of the Zeebrugge LNG Terminal for the 2019-2039 period.

However Fluxys LNG received from one market participant some questions after the deadline to provide any comments to this consultation. Fluxys LNG decided to treat these questions informally in this consultation report.

3. OUTCOME OF CONSULTATION PROCESS

The questions received after the deadline to provide any comments to this consultations are listed as “informally” and individually treated in the “Q&A’s” included in the consultation report submitted to CREG – see appendices. Feedback was received from 1 individual LNG Shippers:

Informal questions/comments:

- One market participant asked for clarification what would happen if not all 110 slots were booked up to 2039. Fluxys LNG clarified that in case not all slots and additional services offered are allocated during the subscription window, Fluxys LNG reserves the right to revise the envisaged evolution of the slots and additional flexibility services tariffs or stop the revision process. In case of a revision, a new consultation would be organised if this revision would lead to an increase of the tariffs higher than 10% compared to the tariffs presented in the consultation. Moreover, a protection mechanism was foreseen for market participants, indeed, if a market participant took part in the subscription window and the approved regulated tariff would be higher than the consulted tariffs, participant would still have the opportunity to execute its step-out rights.

Considering that there were no comments received during the consultation period and one informal question received after the deadline to provide comments to this consultation, the proposal will be submitted for CREG approval as consulted.
