

## **Consultation 44: Scheduling procedure for Truck Loading Services**

**July 13th, 2020**

In a continuous effort to further improve its service offering, Fluxys LNG is proposing to change the scheduling procedure.

The proposed change introduces a scheduling time linked to a Subscription Window. This scheduling time will allow customers to schedule starting hours for the years subscribed during the Subscription Window as of noon on the 3<sup>rd</sup> business day after the closing date of the Subscription Window.

The consultation is being conducted, building upon the last version of the regulated documents as approved by the CREG on December 14th 2017.
