Application for:		New connection	<input type="checkbox"/> existing site <input type="checkbox"/> planned site
		modification to an existing connection	<input type="checkbox"/>
		expansion of capacity	<input type="checkbox"/>
		change in gas pressure	<input type="checkbox"/>
Type of installation			
application			
EC / CCGT / Cogeneration (Mwe)	<input type="checkbox"/>	production-dependent user	<input type="checkbox"/>
continuous consumer (process gas)	<input type="checkbox"/>	flat profile (8000 h)	<input type="checkbox"/>
mixed use (process gas + heat)	<input type="checkbox"/>	modulating profile: number of hours/ 24 h	<input type="checkbox"/>
seasonal user	<input type="checkbox"/>	period in the year:	<input type="checkbox"/>
temperature-dependent user	<input type="checkbox"/>	heating only (2000 h)	<input type="checkbox"/>
Dimensioning details - type of gas			
current parameters		desired parameters	
annual consumption	<input type="text"/> MWh		<input type="text"/> MWh
hourly flow	<input type="text"/> MWh/h		<input type="text"/> MWh/h
hourly flow	<input type="text"/> m3(n)/h		<input type="text"/> m3(n)/h
current gas pressure	<input type="text"/> barg		<input type="text"/> barg
Site plan			
A site plan must be appended, including:			
the possibilities of accessing the land from public land;			
the possibilities of routes on the site (underground and/or aboveground)			
establishment of a pressure regulating station on the site;			
relevant safety restrictions or other restrictions.
