

**Demand Assessment Report  
for incremental capacity  
between  
Interconnector (UK) Limited  
and  
National Grid Gas plc  
at the IBT Interconnection Point**

**27 July 2017**

This report is a joint assessment of the potential for incremental capacity projects conducted by:

Interconnector (UK) Ltd

**Table of contents**

- A. Non-binding Demand Indications 3
- B. Demand Assessment 3
- C. Conclusion for the non-initiation of an incremental capacity project 3
- D. Fees 3
- E. Contact Information 4

## **A. Non-binding Demand Indications**

In accordance with Art. 26 of Regulation (EU) 2017/459, the transmission systems operators conducting this market demand assessment report gave network users the opportunity to submit non-binding demand indications to quantify potential demand for incremental capacity on the respective systems either side of the Bacton interconnection point. The period for submission was 6<sup>th</sup> April to 1<sup>st</sup> June 2017.

Within this period no non-binding demand indications were received by the TSOs for firm capacity on either side of the Bacton interconnection point. Any non-binding demand indications received after the dead-line will be considered in the next market demand assessment report.

## **B. Demand Assessment**

The received non-binding market demand indications within the current incremental process between the entry-exit system of IUK and the entry-exit system of National Grid are zero. Therefore, there is no demand for incremental capacity identified stemming either out of market indications or other sources.

## **C. Conclusion for the non-initiation of an incremental capacity project**

According to the assessment result of the non-binding demand indications, which indicated that no demand levels for incremental capacity need to be developed, no incremental capacity project will be initiated.

Based on the aforementioned decision, no technical studies for incremental capacity projects will be conducted.

Therefore, available capacity (i.e. technical capacity which is not yet booked in the long term) is currently considered sufficient to cover the future need for capacity for the review period. The next planned incremental capacity process will start after the yearly capacity auction in 2019.

## **D. Fees**

For the incremental capacity cycle addressed in this report:

### **(i) National Grid**

A fee would have been required for the submission of any demand indications in accordance with UNC EID Section E, in order to fund technical design studies. As no demand indications were received, National Grid did not receive any fees for the evaluation and processing of non-binding demand indications.

**(ii) IUK**

IUK did not charge a fee for the evaluation and processing of non-binding demand indications.

**E. Contact Information**
