

Are you planning work? Notify it to Fluxys in good time!

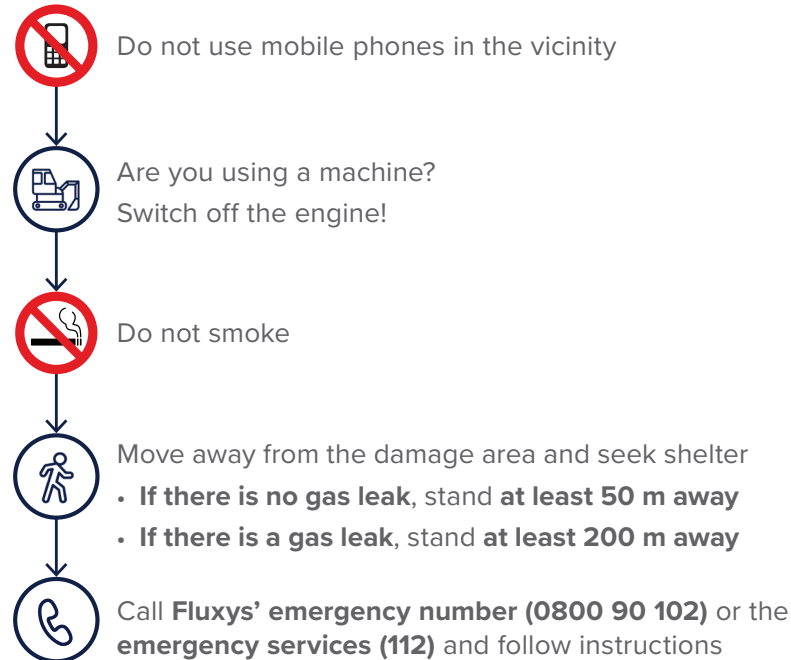

- It's quick and easy to do **online**:
 - **In Flanders**: <https://klip.vlaanderen.be>
 - **In Wallonia en Brussels**: <https://klim-cicc.be>
- You will receive a **confirmation** if there is a Fluxys natural gas pipeline nearby.
- Next, call the regional operating centre: a Fluxys employee will stop by **free of charge**
 - to indicate the location of the pipeline
 - and discuss the **safety measures**.

To make an appointment with a Fluxys employee: call the regional operating centre

In case you hit a Fluxys natural gas pipeline: stop work immediately

Always report any damage to the Fluxys Dispatching Centre (0800 90 102), even if it is very small and even if only the coating of the pipeline was hit. Any damage to a pipeline or its coating can have long-term consequences. In the event of damage, a Fluxys patrol officer will come to the site free of charge.

There is a Fluxys natural gas transmission pipeline near you: how to work and build construction safely?

A Fluxys natural gas pipeline runs through your land or in its immediate vicinity. Carrying out work involving **digging or building constructions** can damage the natural gas pipeline and cause a gas leak.

- It is therefore important to **notify** such work to Fluxys in advance.
- It is essential to consult with Fluxys so that you can work **together** to see how you can carry out the activities safely.
- Only begin work after a Fluxys employee has **visited the site** and explained the necessary safety measures.

Digging or building constructions can damage the natural gas pipeline

- If you want to grow a **vegetable garden**, no problem! You can plant and harvest your vegetables without consulting Fluxys, as long as you don't dig too deep.
- If you want to plant **fruit trees**, plant a **hedge** or install a **fence** around your home, grow tomatoes in a **greenhouse** or **dig** deeper in your vegetable garden, then you'll need to contact Fluxys before getting started.
- If you organise a garden party and set up a **marquee**, then you need to consult Fluxys.
- If you are planning to build a **patio, carport, sauna, swimming pool, swing, chicken coop, garage, garden shed** or **letter box**, then you need to consult Fluxys.
- If you're planning to **store** construction equipment/materials or flammable substances, such as gas bottles or firewood, make sure to contact Fluxys ahead of time.
- As you can see, there are quite **a number of situations that might pose a risk** to the Fluxys natural gas pipeline. Therefore, notify your planned work to Fluxys in good time so that we can assess together how you can implement your plans. Are you working with a contractor? If so, remind them that he needs to notify the work to Fluxys as well.

Here are some examples of work you must notify - when in doubt please contact the regional operating centre.

Planting trees

Planting a hedge

Installing a letter box

Building a house

Digging a swimming pool

Building a garden shed

Building a chicken coop

Building playground equipment

Putting up a fence

Building a greenhouse

Setting up a marquee

Laying a patio
