1.2.1 Subject to the terms and conditions of this LTL and in accordance with the Access Code for LNG Truck Loading, the Terminal Operator shall as from the Effective Date perform, and the Client shall pay for, the LNG Truck Loading including if applicable the LNG Truck Cool Down Services as the Client may have subscribed pursuant to any Service Confirmation Form (attachment A of this LTL), for the relevant Service Term. The Terminal Operator shall under no circumstances be obliged to perform more LNG Truck Loading Services than the Truck Loading Services Rights subscribed, as set out in the Service Confirmation Forms.

1.2.2 Subject to the above, the Terminal Operator shall redeliver to Client such quantity of LNG, which is as close as possible to the Requested Quantity of LNG, based on the GHV and the density of the LNG.

1.3 LIMIT OF TERMINAL OPERATOR'S OBLIGATION

1.3.1 The Terminal Operator shall at no time be obliged to redeliver to the Client at the Redelivery Point for Truck Loading a quantity of LNG, in energy terms (expressed in kWh), greater than Client's Shipper's Gas in Storage account of LNG at the LNG Terminal at that time. In case the Client's Shipper's Gas in Storage is less than the Requested Quantity of LNG to be redelivered to the Client, the Terminal Operator shall inform as soon as reasonably possible the Client and at the latest 24 hours in advance.

1.3.2 Without prejudice to ACTL 3.5 and ACTL 3.7, the Terminal Operator may decide to redeliver to Client a quantity of LNG at the Redelivery Point for Truck Loading which is less than the Requested Quantity of LNG in case the Terminal Operator, at its sole discretion, has reasonable grounds (including but not limited to adverse weather conditions, pressure in the tanks, etc.) to believe that a threat to the heel of the LNG Terminal would occur in case of redelivery of the total Requested Quantity of LNG. In such case, the Terminal Operator shall inform as soon as reasonably possible the Client in advance.

2 **QUALITY**

- 2.1 LNG delivered by Terminal Operator to Client at the Redelivery Point for Truck Loading pursuant to and in accordance with this LTL and the Access Code for LNG Truck Loading, shall comply with the Specification for the Redelivery Point for Truck Loading, as provided for in ACTL 3.3.

Client shall be entitled to either (i) accept such Off-Specification LNG in which case Terminal Operator could in no case be held liable for any damages incurred by the Client due to such non compliancy or (ii) to refuse the Off-Specification LNG.
- 2.3 Neither Party can be held liable for damages arising out of the ageing of LNG to be delivered under this LTL, it being understood that the Terminal Operator shall make reasonable endeavours to minimize the consequences of the ageing.
- 2.4 Without prejudice to GC 9, the Client is liable without any restriction for any damages incurred by the Terminal Operator resulting from the transfer of any substances from the Client's truck to the impacted part of the LNG Terminal.

3 **MEASUREMENT & TESTING**

In accordance with ACTL 3.4, upon completion of the loading operation, Terminal Operator shall determine the quantity of LNG redelivered to Client using a calibrated weighbridge. The quality of LNG redelivered to Client shall be deemed to be the quality of the LNG of the storage tank from which the LNG is loaded. An LNG Truck Quality and Quantity Document shall be provided to the Trucker. Terminal Operator shall use reasonable endeavours to ensure a constant quality of LNG in the relevant tank used for truck loading.

4 **OPERATION AND MAINTENANCE OF THE LNG TERMINAL**
