

Tariffs of Fluxys TENP GmbH –

valid from 1 January 2026, 06:00 a.m., until 1 January 2027, 06:00 a.m.

This is a non-binding English convenience translation of the document

„Entgelte der Fluxys TENP GmbH – gültig vom 01. Januar 2026, 06:00 Uhr, bis 01. Januar 2027, 06:00 Uhr“.

All numbers are written in English writing format.

Due to regulatory requirements of the Bundesnetzagentur, the tariffs are calculated as a so-called postage stamp since 01.01.2020. For the German market area Trading Hub Europe (“THE”), the Bundesnetzagentur issued two decisions: BK9-23/610 („REGENT 2026“) and BK9-24/607 („AMELIE 2026“).

1) Capacity tariffs

a) Annual capacities

The capacity tariffs for bookings of **firm entry and exit capacities** with a booking period of one year are shown in the following table:

Annual tariff 2026 in €/(kWh/h)/a		
FZK	bFZK	DZK
7.06	6.707	6.354

b) Capacities with durations of less than one year

For bookings of **capacities with durations of less than one year** (capacity products with durations of less than one year mean Quarter, Month, Day as well as Within-Day) the following multipliers, in accordance with the Bundesnetzagentur-decision BK9-24/612 („MARGIT 2026“) dated 22 May 2025, apply:

Capacity duration	Multiplier
Quarter	1.10
Month	1.25
Day	1.40
Within-Day	2.00

For the calculation of the tariff for bookings of **capacities with durations of less than one year** (Quarter, Month, Day) the respective annual tariff is divided by 365 and then multiplied with the booking period (in days) and with the corresponding multiplier.

The following calculation method is used:

$$T = \frac{AT}{365} * BP * M$$

where:

- T = Tariff (€/kWh/h) for respective capacity product with duration of less than one year
- AT = Annual tariff of the respective capacity product
- BP = Booking period (in days)
- M = Multiplier applicable for the respective capacity duration

For the calculation of the tariff for bookings of **Within-Day capacities** the respective annual tariff is divided by 8,760 and then multiplied with the booking period (in hours) and with the corresponding multiplier.

The following calculation method is used:

$$T = \frac{AT}{8,760} * BP * M$$

where:

- T = Tariff (€/kWh/h) for respective Within-Day capacity product
- AT = Annual tariff of the respective capacity product
- BP = Booking period (in hours)
- M = Multiplier applicable for Within-Day

c) Interruptible capacities

The discount for **interruptible capacities**, in accordance with the Bundesnetzagentur-decision BK9-24/612 („MARGIT 2026“) dated 22 May 2025, is 10% of the tariff of the firm freely allocable capacity (FZK). The exceptions to this are the following capacities marketed by Fluxys TENP: the interruptible Within-Day capacities at the entry point VIP Germany-CH and the interruptible Within-Day and Day Ahead capacities at the exit point VIP Germany-CH. For these, the discount is 11% of the tariff of the firm freely allocable capacity (FZK).

2) Invoicing

The monthly invoicing for all annual capacities and capacity products with durations of less than one year is based on the calculation methods explained in the Section 1) b) using the number of days of the respective invoiced month, and with the corresponding multipliers for capacity products with durations of less than one year (Quarter, Month, Day as well as Within-Day).

3) Taxes

All indicated tariffs are net amounts. Dues and taxes, e.g. the value added tax, shall be paid by the shipper in addition.
