Subject: Centrica response: Access Terms & Charging Methodology
Date: 26 November 2021 14:38:21

Dear Interconnector UK,

Centrica welcome the opportunity to review and comment on the proposed changes to the **Access Terms and Charging Methodology**.

Firstly, taking each change in the Access Terms:

- BGTI fully supports the enhancements to the IAM. The IAM has been proven to be the preferred mechanism for INT bookings and by both increasing the volume of capacity offered and reducing the suspension period it will further provide Shippers will create more opportunity to access the capacity products and to respond to market conditions more efficiently. We believe the proposal remains compliant with the provisions of the CAM.
- The optional Supplementary Commodity Charge concept would enable INT to provide a carbon neutral transportation service and seems a relevant product offering. Although we note the process has not yet been developed we would support the proposed introduction.
- We have no issues with the proposed revision to the publication of the maintenance schedule.
- We do not have an issue with your proposed amendments to the credit support provisions.
- We support the proposed change to the GB Gas Quality Specification at the Bacton Entry point to future proof the INT access terms for known changes.

On the proposed changes to the **Charging Methodology**, again taking each change in turn:

- We agree with the proposal to remove the option to charge an initial registration fee in its entirety.
- As mentioned above, we agree with the introduction of the Supplementary Commodity Charge.
- We are supportive of providing greater certainty with regards tariffs and we are satisfied with the current Prisma lead times.

If you would like to discuss any aspect of our response please do not hesitate to contact us.

Best regards,
Claire
