

Interconnector's Planned Maintenance for Calendar Year 2026.

Interconnector ("INT") is today launching its stakeholder consultation on the proposed timings for its September 2026 Annual Planned Maintenance Shutdown Period

In August 2024, INT confirmed that the planned maintenance shutdown period would be held within September 2026. Having co-ordinated with its adjacent grid operators INT is proposing a maintenance shutdown beginning 06:00 CET Tuesday 1 September 2026 for a period of up to 20 days.

In line with the Interconnector Access Code, Section I, paragraph 5.2.1 the consultation on this planned maintenance shutdown proposal for Calendar Year 2026 opens today.

Please provide comments, if any, to the proposal by 03 January 2025 by emailing consultation@interconnector.com.

The start date of the September 2026 Planned Maintenance Shutdown will be confirmed by 10 January 2025.

There will be no flow through the Interconnector in either direction for the duration of the maintenance period.

Interconnector Limited - Background

Interconnector Limited owns and operates the strategic bi-directional gas pipeline and terminal facilities linking the UK and continental European energy markets. The system is capable of transporting approximately 803 GWh/d from Zeebrugge to Bacton and 651 GWh/d in the opposite direction.
