

Interconnector (UK) Limited

11 May 2020

Annual Maintenance for Gas Year 2020

The planned annual maintenance for Wednesday 11 November at 06:00 CET to Saturday 21 November at 06:00 CET has been cancelled. The current COVID- 19 pandemic has impacted the delivery of equipment and the availability of vendor resources to perform maintenance works during this period.

IUK are still able to facilitate some necessary maintenance and will be shut down for maintenance for 2 days commencing Wednesday 4 November 2020 06:00 CET and ending Friday 6 November 2020 06:00 CET. There will be no flow through the Interconnector for the duration of the maintenance period.

Another maintenance period will be scheduled for later in the gas year, with the intent to align with UKCS maintenance in Summer 2021. IUK will inform the market and launch a consultation at a later date.

Interconnector (UK) Limited - Background

Interconnector (UK) Limited owns and operates the strategic bi-directional gas pipeline and terminal facilities linking the UK and continental European energy markets. The system is capable of transporting approximately 803 GWh/d from Zeebrugge to Bacton and 651 GWh/d in the opposite direction.
